

Small Business Profile

Advocacy: the voice of small business in government

Florida

Small businesses totaled 2 million in Florida in 2009. They represent 98.9 percent of all employers and employ 42.3 percent of the private-sector workforce. Being such a large part of the state's economy, these businesses are central to Florida's health and well-being.

This profile uses the latest available data to illustrate the status of Florida's small businesses. (Note that a small business is defined as one with fewer than 500 employees.)

- Florida's economy struggled in 2010, with real gross state product decreasing 1.7 percent and private-sector employment decreasing 1.3 percent (Bureau of Economic Analysis, Bureau of Labor Statistics).
- Most of Florida's small businesses are very small as 80.0 percent of all businesses did not have employees and most employers have fewer than 20 employees.
- Small businesses employed 2.9 million workers in 2009 (Table 1) with most of the employment coming from firms with 20-499 employees.
- While the employment situation in 2008-2009 was weak (Table 2), small businesses in Florida represented 62.1 percent of the net new private-sector jobs from 2005-2008.
- Self-employment in Florida increased over the last decade. Minority self-employment fared the best compared with other demographic groups during the decade.*
- Throughout 2010, the number of opening establishments was lower than closing establishments and the net employment change from this turnover was negative (Table 3).

For Further Information

- Data on all states and territories are available at www.sba.gov/advocacy/848.
- For other small business data and analysis, visit www.sba.gov/advocacy/847, call (202) 205-6533, or email advocacy@sba.gov.
- Visit http://web.sba.gov/list to subscribe to Advocacy's Listservs.
- * Because of the relatively low number of veterans in the survey data source, the veteran self-employment figure is susceptible to large fluctuations.
