

Iowa

Small businesses totaled 257,376 in Iowa in 2009. They represent 97.2 percent of all employers and employ 51.8 percent of the private-sector workforce. Being such a large part of the state's economy, these businesses are central to Iowa's health and well-being.

This profile uses the latest available data to illustrate the status of Iowa's small businesses. (Note that a small business is defined as one with fewer than 500 employees.)

- Iowa's economy was mixed in 2010, with real gross state product increasing 0.1 percent and private-sector employment decreasing 0.7 percent (Bureau of Economic Analysis, Bureau of Labor Statistics).
- Most of Iowa's small businesses are very small as 75.4 percent of all businesses did not have employees and most employers have fewer than 20 employees.
- Small businesses employed 664,664 workers in 2009 (Table 1) with most of the employment coming from firms with 20-499 employees.
- While the employment situation in 2008-2009 was weak (Table 2), small businesses in Iowa represented 55.1 percent of the net new private-sector jobs from 2005-2008.
- Self-employment in Iowa surged over the last decade. Minority self-employment fared the best compared with other demographic groups during the decade.*
- Throughout 2010, the number of opening establishments was lower than closing establishments and the net employment change from this turnover was positive (Table 3).
