

# Congressional District Small Business Profiles

**2026**

**VIRGINIA**

The Office of Advocacy at the Small Business Administration was created by Congress in 1976 and provides an independent voice for small business within the executive branch. Appointed by the President and confirmed by the Senate, Chief Counsel Casey Mulligan directs the office. Chief Counsel Mulligan advances the views, concerns, and interests of small business before Congress, the White House, federal agencies, federal courts, and state policy makers. Regional advocates and an office in Washington, DC, support his efforts.

The statutory mission of the Office of Advocacy includes examining the role of small business in the economy. The Office of Economic Research accomplishes this objective by publishing small business research products and sponsoring and disseminating small business data and statistics. This report uses the latest government data to profile the small businesses in the congressional districts of Virginia. It was prepared by Research Economist Daniel Wilmoth with editorial support by Editor Akira Loring, Senior Editor M. B. Humphrey, and Director of the Office of Information David Tokarz.

This report is part of a series that shows the important roles that small businesses play in congressional districts across the nation. District 1 of Montana, located in the western part of the state, led the nation in small business share of employment, at 70.4 percent. District 12 of New York, located in Manhattan, had the most small businesses with employees, at 51,317. District 32 of California, which includes Malibu and parts of Los Angeles, had the highest self-employment rate, at 19.2 percent. Readers are invited to compare congressional districts to the [nation](#), [states](#), [rural areas](#), and [metropolitan areas](#).

The Office of Advocacy regularly releases other research products, ranging from short fact sheets that use new data to show emerging trends to lengthy reports that use sophisticated statistical techniques to explore complex issues. To learn more about small businesses, regulatory issues, and the Office of Advocacy, visit [advocacy.sba.gov](https://advocacy.sba.gov).

### About this profile

Small businesses are defined here as firms with fewer than 500 employees. Congressional district boundaries correspond to the 119th Congress. Statistics of U.S. Businesses are produced through a partnership between the Office of Advocacy and the Census Bureau. Where notes refer to the “source of original data,” values shown may have been approximated because of missing values in the original data. Electronic versions of this and other [geographic profiles](#) are available online, along with technical notes about data, methods, and definitions. Visit [advocacy.sba.gov](https://advocacy.sba.gov) for additional resources.

# Technical Notes

## Classification of businesses

A single business may encompass multiple establishments if it operates at multiple locations. A business is classified as small in these profiles if it employs fewer than 500 employees across all establishments. Classification by industry is made at the establishment level, so a business encompassing multiple establishments may participate in multiple industries. A business participating in multiple industries would be included in the total for each industry, so the sum of businesses across industries may exceed the total number of businesses. Boundaries for congressional districts correspond to the 119th Congress, which began on January 3, 2025.

## Data

All data used in these profiles are publicly available and published online. Data and associated technical documentation can be accessed using the hyperlinks in the source notes for each feature. Years indicated in source notes are the years the data describe, which may not match the naming convention used by the data publisher. Where no year is listed, data from multiple years were used.

Statistics from the American Community Survey describing self-employment represent the population age 16 years and over. Self-employment rates were estimated using values from Table B24080. The total numbers of private workers used in the calculations were the numbers of “private for-profit wage and salary workers” in the table. Median incomes are from Table S2419 and include only income from labor, called “earnings” in the table. Statistics in the text are from 2024 one-year data while values shown in the maps are from 2023 five-year data.

Values were imputed for some features when published data were missing or obviously erroneous. A source note that begins “Source:” indicates that statistics in a feature are as reported by the source, with no imputation. A source note that begins “Source of original data:” indicates that the feature includes an imputed value for at least one profile.

## Software

The profiles were created using R with formatting through HTML and CSS. Data visualizations were primarily created using the ggplot2 package in R. Tables were primarily created using the knitr and gt packages. Elements were combined into an HTML document using the knitr package. A PDF document was created from the HTML document using Prince XML.

## Rounding

Numbers in these profiles have been rounded if they include a decimal point, with the number of digits after the decimal point indicating the precision preserved under rounding. Numbers ending in 5 were rounded up. For example, 1.05 would be rounded to 1.1, while 1.04 would be rounded to 1.0.

## Contact

Any additional information that may be helpful for interpreting or reproducing the analysis is available by request. The SBA Office of Advocacy can be contacted at [advocacy@sba.gov](mailto:advocacy@sba.gov).
